PLANNING FOR SPRING

Dear Customer

With Autumn drilling finished and crops looking well thoughts turn to spring and we are able to offer the following.

FERTILISERS SUITABLE FOR ORGANIC SOILS

When the weather is suitable the winter is an ideal time to apply Slag and Gypsum products to your land.

We have a range of products to supply
LIME, PHOSPHATES, POTASH, SULPHUR, MAGNESIUM, MANGNESE and TRACE ELEMENTS to improve soil structure , drainage , workability and root development

SUPER SLAG BASIC : Use in place of lime to supply phosphate and many trace elements. Improves palatability of pasture and improves the health of grass and livestock.

Highly effective on Cereals and vegetable crops as it is on grassland even where ph is reasonable.

ROCK PHOSPHATE 29/30% phosphate first choice where high levels of phosphate only are required.

NATURAL GYPSUM Typically **48% So 3 20% Ca o**

First choice where calcium and sulphur are required where heavy soils need breaking up or aerating. **NOW AVAILABLE AT HIGHLY AFFORDABLE PRICES.**

ORGANIC GRAIN MARKETING

The open Autumn season has contributed to a lower demand for Organic feed grains and values have drifted lower.

However there are still excellent market opportunities available.

Organic Milling Wheats are required to buyers in all parts of the country.

Organic Peas and Beans are finding ready buyers

Organic Milling Oats are required for UK and Continental buyers.

Organic malting Quality Westminster Spring barley is required for UK and continental Buyers.

LOOKING AHEAD FOR 2012

We have buyers requiring Naked oats , Malting Barley, Milling Quality Oats for UK and Continental buyers as well as large tonnages of Organic Feed Grains

ORGANIC GRASS SEED PRICES WILL BE CIRCULATED AS SOON AS THEY ARE AVAILABLE IN THE NEW YEAR.

We look forward to servicing your many and varied requirements, and wishing you a happy festive season

Yours sincerely
